Energizer® is leading the power and portable lighting categories worldwide with a powerful portfolio of groundbreaking products and consumer-led innovation.

Our battery and light products are sold in more than 140 markets around the globe.

► Innovation at the heart of our strategy

From the first dry cell battery back in the 1890's, **Energizer®** has continuously built a rich history of powerful advancements with innovation always at the heart of the strategy.

► A unique full line portfolio

The **Energizer®** portfolio counts with best-in-class product specifications and professional dedicated solutions designed to be used in the most technical work environments.

Our strong claim "Makers of the world's longest lasting battery (Ultimate Lithium™ AA)" reinforces our position of technologically advanced brand, capitalizing on the outstanding and unique performances of our Ultimate Lithium™ AA & AAA batteries.

AND RECLOSABLE

ENVIRONMENTALLY FRIENDLY
CARDBOARD PACKAGING

*AA/AAA sizes available. C/D/9V only available for Max Plus™

Ultimate Lithium™

The world's highest energy and longest lasting batteries*

HIGH ENERGY & LONGEST LASTING

▶ **Up to 11x longer lasting****
For critical work tools

** in digital cameras vs. Energizer® basic alkaline AA only

OUTDOOR USAGE

▶ **Performs in extreme temperatures*****

from -40°C...

to 60°C

*** only for AA/AAA/9V

IDEAL FOR PORTABLE DEVICES

▶ **25% (9V) to 33%(AA/AAA) lighter** than standard Alkaline

BEST PERFORMANCE

▶ **The best AA battery** for peak performance in all devices****

▶ **20 years shelf life (AA/AAA)**

▶ **Leak resistant construction**

**** vs. Alkaline Batteries

ATEX certified

Lithium AA & AAA batteries are certified as a component in intrinsic safety apparatus according to directive 94/9/EC ATEX. They can be used safely to power devices in hazardous environments

Energizer
MAX PLUS™

Energizer
MAX PLUS™

Power for demanding devices and work tools

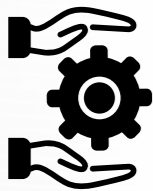

Alkaline Performance

NOW UP TO **100%** LONGER LASTING*

No alkaline performs better
Max Plus is our No. 1 longest lasting alkaline (AA/AAA)

Increased efficiency
Supporting larger energy demands from today's devices.
Longer lasting power means fewer battery replacements for more efficiency

A positive impact on environment
Using less batteries for the same job and generating less waste

OUR LONGEST LASTING ALKALINE (AA/AAA)

▶ **Lasting power for demanding devices**
For everyday usage

MADE TO LAST, NOT TO LEAK

▶ **Reduces damaging risks for devices and work tools**

RELIABLE & RESISTANT

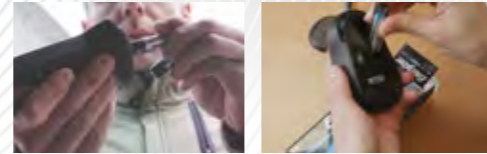

▶ **12 years shelf life (AA/AAA)**
Ready to use when you need them

Energizer®

RECHARGE

Nº1 rechargeable
brand in the world**

NEW
As of May 2021

Energizer®

RECHARGE

RECHARGEABLE

Reusable power

ECONOMICAL & ECOLOGICAL

▶ **For frequently used devices**

Can be recharged 100s of times

▶ **Made with up to 15% recycled material***

Available for AA (2000 and 2300 mAh) and AAA (700 and 800mAh) batteries only. C, D and 9V batteries are made with 7% recycled material

UNCOMPROMISING PERFORMANCE

▶ **Lasts up to 6x longer****

The higher the mAh, the more the rechargeable battery can be used in high drain devices and the longer it lasts

**in digital cameras vs. Energizer® basic alkaline, results vary by device. Energizer® Accu Recharge Extreme AA and AAA only)

EASY TO USE

▶ **Pre-charged (AA/AAA)**

Ready to use from purchase

Holds charge for up to 1 year***

***when not in use (Energizer® Accu Recharge Power Plus AA/AAA)

LIGHTS

LIGHTS ARE ESSENTIAL WORK TOOLS

Why is it important to select the appropriate lighting solution?

► To improve comfort and ensure safety

- High quality LEDs without dark spots & areas for visual comfort
- Impact resistance and water resistance
- ATEX certified lights for hazardous work environments

► To facilitate interventions

- Handheld and hands-free solutions
- Choose an adapted light solution based on your needs for light intensity, beam distance, and run time

Circulate and move about safely

Long distance lighting

Close-up work

Light a wide work area

Optimize your light efficiency by choosing the right battery

ALKALINE: For everyday usage

LITHIUM: Recommended for outdoor (Performs in extreme temperatures from -40°C to 60°C) and for most powerful torches over 300 lumens

RECHARGEABLE: Recommended for frequent usage (daily or weekly basis)

WHAT ARE THE LIGHTS CHARACTERISTICS?

Lights performances are accredited by ANSI standards

The American National Standards Institute ensures products performances are all measured based on a common protocol to facilitate product comparison and consumer's choice.

► Luminous flux

The amount of light is expressed in LUMENS.

The more Lumens, the brighter the light will be.

The beam angle also has a direct effect on luminosity. As it widens, the intensity decreases.

Wide beam

Concentrated beam

► Beam distance

Projection distance of a light beam onto a surface.

Expressed in meters.

► Run time

How long a light can run until it offers 10% of the initial lumen output. Expressed in hours.

► Water resistance

Water resistance levels are measured in relation to IEC 60529 IPXX standards. Some **Energizer**® lights are IPX4 or IPX7 certified.

IPX4: Resist water splashing from any direction.

IPX7: Resist temporary water immersion. 30 minutes at 1 meter depth.

► Impact resistance

Expressed in meters.

After dropping in 6 different orientations, the lights retain all the performances established above.

What is ATEX

ATEX (ATmosphere EXplosive) is a European directive that requires to control the risk of Explosion in certain atmospheres. Areas where explosions may occur have to be identified and measures have to be taken to prevent these explosions.

Energizer® ATEX lights are suitable for:

- ▶ Every atmospheres where Gas and Vapors can cause an explosion (Zone 0, 1 & 2)

- ▶ Both product groups
Group 1: case specific to mines
Group 2: all surface industries

What are the characteristics of ATEX certified lights?

CE 0539 Ex I M 1 / II 1 / G / Ex / ia / op is / I / IIC T4

- CE Authorized by the European: Committee for electrochemical standardization
- 0539 Marking certifying DEMKO / UL international quality control
- Ex Protection against explosions
- I M 1 Mine equipment, category M1: high protection
- II 1 Surface industry type equipment, category 1: very high protection
- G Suitable for gas and vapor type risk environments
- Ex Tested to the latest European manufacturing standards
- ia Light material design ensuring maximum intrinsic safety
- op is Inherently safe optical radiation protection
- I For use in Mines category 1
- IIC Resistant to gas groups Acetylene and Hydrogen, Ethylene and Propane
- T4 Temperature class 4: resist up to 135°C

Energizer® Ultimate Lithium™ Batteries are ATEX certified

Lithium AA & AAA batteries are certified as a component in intrinsic safety apparatus according to directive 94/9/EC ATEX. They can be used safely to power devices in hazardous environments
